3001 Bern

‘Efficiency is doing things right; effectiveness is doing the right things.’

- Peter Drucker

Varvara is a law student at the University of Zurich, specializing in the integration of law and technology. With a strong foundation in Swiss law, she is dedicated to fostering modern solutions in the evolving legal landscape. She gained international experience through a program at Cornell University and the Université Sorbonne in Paris, spending two semesters in New York City and gaining exposure to the U.S. legal system.

Currently, she is a genAI researcher and legal process engineer at Kellerhals Carrard, developing AI-driven solutions for the legal domain. She integrates legal expertise with process engineering, designing systems that streamline legal processes and enhance decision-making through automation.

Previously, she founded and managed a digital services agency for four years, specializing in tailored strategies and visual content for clients in Switzerland, Italy, and the U.S., gaining skills in digital communication, web design, and public relations.

Passionate about innovation and problem-solving, Varvara combines legal expertise with technological proficiency in her work.
